Experience

ACRELEC

São Paulo - Brazil (Remote)

Full-stack Software Engineer

Apr 2024 - present

- Co-led the development of a React and Python-based self-service kiosk solution for **Burger King France**, taking the project through a successful pilot with thousands of monthly customers, and implementing complex ordering and third-party loyalty integration flows.
- Developed and deployed a reusable React UI component library and integrated it into the company's POS application as part of a UI modernization initiative.
- Developed features and resolved production issues across Angular-based Digital Order Taker (DOT) applications used by major QSR customers, including Taco Bell and KFC in France.
- Developed a Flutter frontend of a near-real-time KPI monitoring application, delivering operational metrics with updates approximately every five minutes.

DATABIND

Paraná, Brazil (Remote)

Frontend Software Engineer (Contract)

Dec 2024 - Sep 2026

- Built the Helpfy mobile app from the ground up, a marketplace connecting service professionals with clients, using React Native, Expo and FCM for push notifications. Published on the App Store and Google Play, currently in public beta.
- Developed the SmartInsur frontend, an end-to-end online insurance services platform built in React, taking the project from initial architecture to final client handoff.

COMET CASH**Miami, Florida - USA (Remote)****Full-stack Software Engineer****Jun 2023 - Jan 2024**

- Contributed to the development of a payment processor application integrated with the **Bitcoin Lightning Network**. The system was used during a major São Paulo bitcoin-focused event (Satsconf), processing over 60,000 transactions with minimal disruptions.
- Participated in the development of a React Native Bitcoin wallet app containing features such as user-to-user chat using the Nostr protocol and secure payment processing.
- Developed a comprehensive web platform with Next.js for Point-of-Sale (POS) management.

BITCAPITAL**São Paulo - Brazil (Remote)****Full-stack Software Engineer****Nov 2021 - May 2023**

- Developed a Next.js KYC platform used to onboard and manage the company's clients.
- Helped maintain a critical Vue.js application which facilitated bank transactions through PIX, as well as user wallet, PIX keys management and infractions.
- Maintained and extended a NestJS API integrated with BACEN systems for PIX banking transactions.

FREACCESS**Boituva, São Paulo - Brazil****Systems Analyst****Oct 2020 - Nov 2021**

- Developed frontends for access control systems for both web (Angular & Typescript) and mobile (Java).
- Maintained the API (Node.js) that supplies the company's internal systems through bug fixing and implementing new features.
